

Phase 1 Submission

Vijay Kumar Tummala

Praveen Kumar Surapaneni

Sasya Mallireddy

There is a folder which contains all the data that needs to be submitted for this phase. **Source** folder contains the source code that was used to download tweets and generate the word count for the downloaded tweets. Output file contains output link (external cloud link) that has all the files that are generated after running the source code of the two applications we have written.
